Labour Force Statistics Highlights

BRITISH COLUMBIA | BCStats

Reference date: March 2018 Issue: #18-03 Released: April 6, 2018

The unemployment rate remained the same at 4.7%.

The participation rate decreased 0.1 percentage points to 64.9%.

The employment rate decreased 0.2 percentage points to 61.8%.

B.C. Highlights

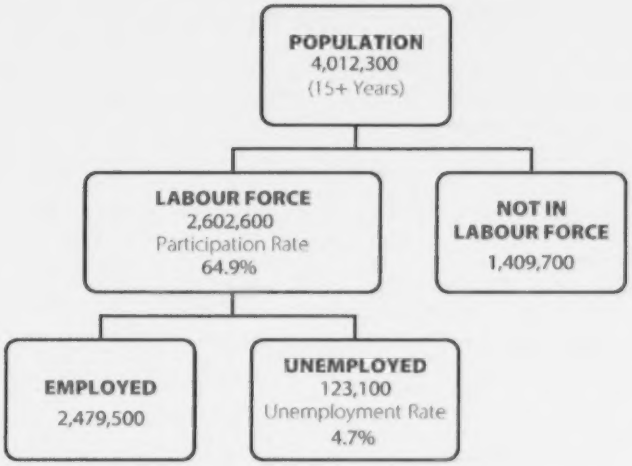
The unemployment rate in British Columbia was 4.7% in March, unchanged from February and below the 5.3% it was 12 months ago. The size of both the labour force (-2,100) and the number of employed (-3,900) were down slightly from February. Compared to 12 months ago, job growth (+32,700) has outpaced the growth in the labour force (+17,500).

There were 23,800 more full-time jobs in March and 27,700 fewer part-time jobs compared to February. Most of the gains in full-time jobs were observed by the 25 to 54 (+12,000) and 15 to 24 (+9,700) age groups, while those aged 55 and over saw a smaller increase (+2,100). Part-time employment went down for the 15 to 24 (-17,300) and 25 to 54 (-14,700) age groups, while those aged 55 and over had more part-time jobs (+4,300).

In March, employment in the public sector was up (+7,000), while there were fewer employees in the private sector (-6,200) and the number of self-employed individuals was also down (-4,800) compared to February.

Provincial Comparisons

At 4.7%, British Columbia's unemployment rate was the lowest in Canada during the month of March. Ontario had the second lowest unemployment rate



(5.5%), followed by Quebec (5.6%), while Alberta's unemployment rate (6.3%) was fifth highest among the provinces.

National Highlights

Employment in Canada increased by 32,300 in March, while the unemployment rate was unchanged at 5.8%. The unemployment rate was down from one year ago, when it was 6.6%.

Gender

In March, employment in British Columbia for men (aged 25 years and over) added 1,900 jobs, while the labour force grew by 4,200. As a result, the

Note: All labour force statistics are seasonally adjusted, unless otherwise indicated

unemployment rate was 4.3%, up from 4.2% for the previous month.

For women (aged 25 years and over), employment increased by 1,900 jobs in March. The labour force increased by 4,600, which resulted in the unemployment rate rising 0.2 percentage points to 4.3%.

Compared to March 2017, the unemployment rate for men was down by 0.6 percentage points to 4.3%, and for women it was unchanged at 4.3%. Jobs for men increased by 24,900 (+2.3%) compared to a year ago, and employment for women grew by 15,400 (+1.5%).

Youth Aged 15 to 24 Years

The unemployment rate for youth aged 15 to 24 years was 7.3% in March, down 0.6 percentage points from the previous month. Total employment decreased by 7,600, while 10,800 individuals left the labour force. The addition of 9,700 full-time positions could not offset the loss of 17,300 part-time jobs.

Compared to March 2017, the unemployment rate for youth was down 2.3 percentage points from 9.6%.

Census Metropolitan Areas (CMAs)

In March, employment shrank in Vancouver (-8,700 or -0.6%), Abbotsford (-1,200 or -1.2%) and the areas outside the CMAs (-700 or -0.1%). Victoria (+5,900 or +3.1%) and Kelowna (+800 or +0.8%) saw increases in employment from the previous month.

Industry

Employment in the goods-producing sector was down (-4,000 or -0.8%) in March. Agriculture (-4,500 or -16.6%) saw the largest decrease in employment, followed by manufacturing (-1,200 or -0.7%) and forestry, fishing, mining, quarrying, oil and gas (-100 or -0.2%). On the other hand, construction (+1,100 or +0.5%) and utilities (+700 or +5.4%) added positions. In the twelve months to March, the goods-producing sector added 20,300 (+4.2%) jobs.

In March, overall employment was stable in the services-producing sector (+100 or +0.0%) compared to the previous month. Within industries, educational services (+6,400 or +4.0%) posted the largest increase, followed by health care and social assistance (+5,000 or +1.6%) and business, building and other support services (+3,200 or 3.2%). Conversely, wholesale and retail trade (-9,200 or -2.4%) saw a decrease in positions, while employment for information, culture and recreation (-7,700 or -5.9%) and other services (-2,300 or -1.9%) contracted as well. Since March 2017, the services-producing sector has added 12,400 (+0.6%) positions.

NOTES: 1. Occupation specific Unemployment Rates include only those unemployed who worked in the past year. The "All Occupations" rate incorporates total unemployed persons which includes an "Occupation Unclassified" category.

2. Due to the relatively small sample sizes from which disaggregated data are derived, caution should be used in the interpretation of month-to-month changes in the estimates.

3. For the unemployed, industry or occupation is based on the last job held in the previous year. No information is collected on industry or occupation of job search.

Labour Force Statistics

This report is based on statistics from the Labour Force Survey produced monthly by Statistics Canada.

Definitions and Explanatory Notes

Reference Week

Monthly estimates of employment, unemployment, and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

Labour Force

The labour force is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed

Employed persons are those who, during the reference week, either: (a) did any work at all, or (b) had a job but were not at work due to own illness or disability, personal or family responsibilities, bad weather, labour dispute, vacation, or other reason not specified above (excluding persons whose job attachment was to a job to start at a definite date in the future).

Unemployment

Unemployed persons are those who, during the reference week, either: (a) were without work, had actively looked for work in the past four weeks (ending with the reference week), and were available for work; or (b) had not actively looked for work in the past four weeks but had been on layoff and were available for work; or (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group.

Participation Rate

The participation rate represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force for that group expressed as a percentage of the population for that group.

Employment Rate

The employment rate (employment/population ratio) is the number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, etc.) is the employment for that group expressed as a percentage of the population for that group.

Rounding

Estimates published by the Labour Force Survey are rounded to the nearest thousand but all derived values (totals, averages, rates, ratios, percent changes etc.) are calculated from unrounded figures. Therefore, the sum of the individual rounded items may not equal the total.

Seasonal Adjustment (S.A.)

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods, and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.
